

# What is Coproduction?

Co production is a way of involving people in the development of services, practice and policy from the start of the process in a way that is inclusive.

Co production is:

- People who use services, their families, carers and professionals coming together as equals.
- All people are involved in every step of the process.
- No one is left out, everyone involved gets to share their experiences as part of the process.
- Meetings are structured in such a way that everyone understands what is happening.
- Everyone get the chance to have their say in making real changes
